Addenda

1) Page 340, line 37 after "of the Code.", add: "The third syntype is listed by Böhlke (1953) in "A catalogue of the type specimens of Recent fishes in the Natural History Museum of Stanford University. *Stanford ichthyol. Bull.* **5:** 78, as S.U. 21185. This collection is now in the Californian Academy of Sciences".

3) *Johnius aneus* Bloch
Since publication, further information from Dr H. J. Paepke has necessitated a change in status of the type. There are two entries as type in the catalogue of the Zoologisches Museum der Humboldt Universität, Berlin, but one is lost and the surviving "type" (ZMB 8798) is probably a syntype and is here designated lectotype. Therefore on pp. 429, 470 and 533 "holotype" should read "lectotype".
